DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Yang et al (Tetrahedron Letters or J.Am. Chem. Soc., vol. 120, no46, 1998) or Norvez et al (J. Chem. Soc.Chem Commun., 1990 or Liquid crystals, vol. 14, no.5, 1993 or J. Org. Chem., 1993).

All of the references disclose a polymer or oligomer comprising an iptycene (see Abstract in the references.)

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 2-34 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over the references, as stated above.

The references disclose the polymer or oligomer comprising an iptycence.

The disclosures of the references differs from the instant claims in that they do not disclose the claimed MW, nor the shape persistent molecule containing bridgehead

Application/Control Number: 10/764,768

Art Unit: 1711

atoms, with molecular structures radiating from the bridgehead atoms in three directions nor the length of Van der Waals contact, as in the claims.

However, the references do disclose specific structures which are included in the broad teachings of the claims. In view of this similarity, it would appear to be inherent that the product, a composition of the claimed characteristics, as stated above, could be prepared following the teachings of the references.

Claims 35-45 are rejected under 35 U.S.C. 103(a) as being unpatentable over the references, as stated above.

The references disclose the polymer or oligomer comprising an iptycene and inherently having the claimed characteristics.

The disclosures of the references differ from the instant claims in that they do not disclose the use of said composition to form devices, as in the claims.

However, the references do disclose the use of said components in the formation of chemical sensors, liquid crystals. Therefore, it would have been obvious to one of ordinary skill in the art to select the components from the references within the limitations of the instant claims since they have been shown to be effective in a similar system and thus would have been expected to provide adequate results. There is no showing of unexpected results derived from said selection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Duc Truong whose telephone number is 571-272-1081. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Seidleck can be reached on 571-272-1078. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
